

Boil Water Notice for Community Public Water Systems
February 17, 2021

Due to reduced distribution system pressures, the Texas Commission on Environmental Quality has required the **WARMS SPRINGS REHAB. HOSPITAL, PWS# 0890005, public water system** to notify all customers to boil their water prior to consumption (e.g., washing hands/face, brushing teeth, drinking, etc). Children, seniors, and persons with weakened immune systems are particularly vulnerable to harmful bacteria, and all customers should follow these directions).

To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking, and ice making should be boiled and cooled prior to use for drinking water or human consumption purposes. The water should be brought to a vigorous rolling boil and then boiled for two minutes.

In lieu of boiling, individuals may purchase bottled water or obtain water from some other suitable source for drinking water or human consumption purposes.

When it is no longer necessary to boil the water, the public water system officials will notify customers that the water is safe for drinking water or human consumption purposes.

Once the boil water notice is no longer in effect, the public water system will issue a notice to customers that rescinds the boil water notice in a manner similar to this notice.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions concerning this matter, you may contact James Mace at 2510 E Pierce, Luling, TX 78648. Phone No. 830.875.5131.

At this time, we request that the community help us reduce the load and stresses on our water infrastructure systems by conserving water within your household; therefore, allowing our repair crews to continue the necessary repairs to get the systems operating at full capacity. We request that you **ONLY USE WATER AS ABSOLUTELY NECESSARY. We are currently experiencing extremely low water levels. We truly appreciate your patience and cooperation during this trying time. Our crews are working 24/7 to address the issues being caused by the unprecedented weather situation.**
