

Boil Water Notice Rescinded
February 23, 2021

On February 17, 2021, the Texas Commission on Environmental Quality required the WARM SPRINGS REHAB HOSPITAL public water system, PWS# 0890005, to issue a Boil Water Notice to inform customers, individuals, or employees that due to conditions which occurred recently in the public water system, the water from this public water system was required to be boiled prior to use for drinking water or human consumption purposes.

The public water system has taken the necessary corrective actions to restore the quality of the water distributed by this public water system used for drinking water or human consumption purposes and has provided TCEQ with laboratory test results that indicate that the water no longer requires boiling prior to use as of February 23, 2021.

If you have questions concerning this matter, you may contact James Mace at 2510 E Pierce ST, Luling, TX 78648. Phone No. 830.875.5131

We thank you for patience and understanding during this trying time.
Main line pressures and chlorine residuals have now been returned to normal.
All microbiological samples have tested negative.

Your water is now safe to drink and utilize in your daily routine without boiling it.
